Education

Far Eastern University - Institute of Technology

Manila, Philippines

Bachelor of Science in Computer Science - Software Engineering

September 2026

Full Ride Scholar, Top Performing Student Awardee, Best Thesis Award

Experience

KMC Solutions

Makati Philippines (On-site)

Systems Support & Deployment Intern

April - July 2026

- Troubleshoot desktop, software, network, and hardware issues, applying systematic problem-solving and technical analysis to identify and resolve end-user issues
- Assisted in system maintenance, backup operations, device configuration, and software deployment, gaining practical experience with IT systems and deployment workflows
- Developed and maintained technical documentation for IT procedures and troubleshooting workflows, ensuring accurate and organized reference materials for technical support operations

CommVerge Solutions

Makati Philippines (On-site)

Network Solutions Engineer Intern

December 2025 - March 2026

- Monitored platform performance and KPIs following system cutovers and migration pilots, identifying irregularities and supporting technical issue investigation across multiple platforms
- Managed and maintained technical tickets by documenting system issues, investigation progress, resolutions, and follow-up actions with accuracy and attention to detail
- Assisted senior engineers with GUI administration and platform-related tasks, gaining hands-on exposure to technical systems, troubleshooting workflows, and software support processes

Projects

Harvard Resume Generator | *React, JavaScript, HTML5, CSS3, Vite, Git/GitHub*

May 2026

Web app that lets users create a Harvard-style resume with live preview and PDF export.

- Built a React app with reusable components sections like personal info, education, experience, skills, and projects
- Added real-time preview so users can instantly see updates as they edit their resume
- Enabled PDF export so users can download a properly formatted resume
- Organized the project using a simple MVP structure with clean, reusable code components

XeeAI - Explainable AI | *Next.js, React, TypeScript, Python, FastAPI, Tailwind CSS, Gemini AI, scikit-learn, Docker* **June 2025**

Full-stack explainable AI platform that visualizes how language models interpret user inputs and generate responses using the C-LIME interpretability algorithm.

- Built a full-stack AI chatbot using Next.js, React, TypeScript, and FastAPI with Google Gemini for real-time responses
- Added C-LIME explainability to show how inputs affect AI-generated outputs through simple visual insights
- Created responsive UI and data visualizations using Tailwind CSS, shadcn/ui, Recharts, and Framer Motion
- Containerized the backend with Docker and deployed the app using Vercel and Render for production use

Shelves & Storage Equipment Website | *HTML, CSS, JavaScript, PHP*

July 2025

Business website for showcasing shelving, racking, and storage solutions, and SEO optimization.

- Developed a responsive business website using HTML, CSS, and JavaScript to present product and storage solution offerings
- Implemented interactive front-end functionality using JavaScript to enhance user navigation and website usability
- Integrated PHP-based email functionality to support communication between website visitors and the business

Certifications

- Microsoft - Career Essentials in Software Development by Microsoft and LinkedIn
- OpenEDG Python Institute - OpenEDG Python Institute: Programming with Python Professional Certificate
- Cisco - DevNet Associate
- PMI - PMI Project Management Ready
- Certiport - Python Information Technology Specialist

Skills: JavaScript, TypeScript, Python, React, Next.js, Node.js, FastAPI, HTML/CSS, PHP, Git, Docker, REST APIs, UI/UX, Figma
